

# Securepoint Antivirus Pro

Virus protection with central cloud management

Comprehensive virus protection.

Best manufacturer.  
Best products.

## One of the best scan engines

Securepoint Antivirus Pro integrates the IKARUS T3.scan.engine, one of the best engines available anywhere in the world.

## Central cloud management

Licence, update and infection status can be managed using a single interface, regardless of where the end-user device is located.

## Comprehensive virus protection

Antivirus Pro protects PCs and servers from viruses and malware with on-access scanning and planned, on-demand scans.

## Low system resource demand

The entire system architecture of Securepoint Antivirus Pro is designed to work fast and with low demand of system resources.

# Reliable virus protection

## Central cloud management

Securepoint provides every customer with a comprehensive central management portal for operating Securepoint Antivirus Pro within the company. The portal displays all installed client systems including their respective licence, update and infection status. The location of individual devices makes no difference as communication takes place, encrypted, via the internet. Resellers can also see the information of all customers with a single login.

No additional licence fees are charged for the management portal. There is no time or effort to spend on installation, updates and maintenance.

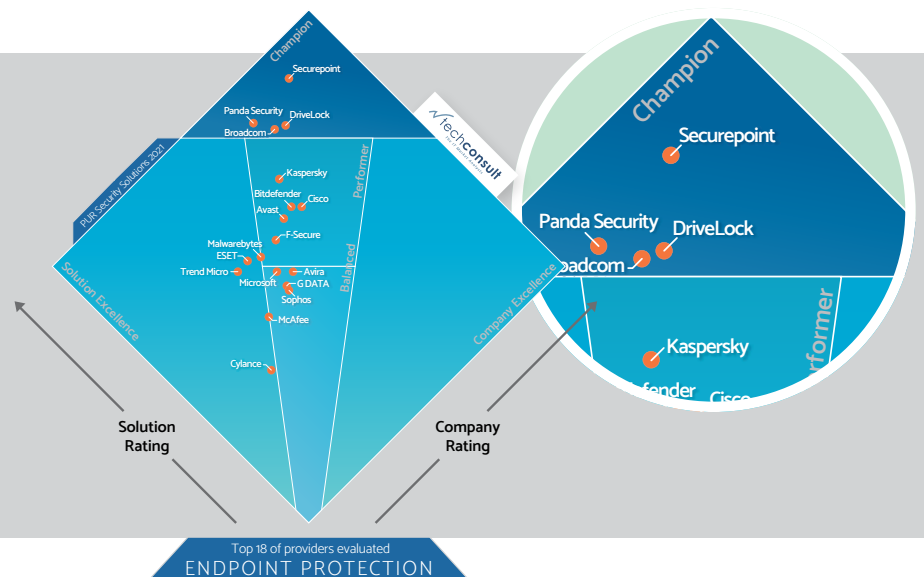

## Reliable and fast

Today, virus protection is a standard in every company. There are two fundamental requirements: performance and a high rate of recognition. The award-winning Scan Engine integrated in Securepoint Antivirus Pro takes care of both of these essentials. The IKARUS T3.scan.engine is one of the best in the world.

Securepoint Antivirus Pro overcame one of the most important hurdles with flying colours. The scan engine was one of the first to receive "Windows 10 Ready" certification.

## „techconsult PUR 2021“

In the independent study "Professional User Rating Security Solutions 2021" (PUR-S), Securepoint was crowned champion in the "Endpoint Protection" category. Conducting this study for the fifth time, analysis company techconsult asked more than 2,000 users were asked about IT security manufacturers and their solutions.

# For small and medium-sized enterprises

Companies can therefore be certain of a market-leading recognition rate as well as fast and reliable operation.

## Comprehensive and precise

The Securepoint Antivirus Pro application can be installed with the same licence on both Windows Desktop and server systems. It protects PCs and servers from viruses and malware with on-access scanning and planned, on-demand scans.

With the combination of rapid update cycles and the formidable scan engine, Securepoint Antivirus Pro provides reliable protection for business.

By doing without unnecessary ballast, the application is fast and stable whilst retaining a high level of protection. Administration is simple and straightforward.

Comprehensive  
virus protection.

## Advantages of Securepoint Antivirus Pro

- High performance with low demand for system resources
- Integrated award-winning IKARUS T3.scan.engine
- Prompt updates
- Email monitoring, incl. anti-spam
- Central cloud management (no installation)
- Planned scans / comprehensive scan profile
- Quarantine function
- Password-protected settings
- Cost-efficient and incl. all product updates

„Developing Securepoint Antivirus Pro, our goal from the very beginning was to provide our customers and partners with a central console for AV administration of all PC and server systems. Thanks to cloud technology, this is possible from anywhere, with no installation and no maintenance.“

- Eric Kaiser Product Manager

# Securepoint Antivirus Pro

## Integrated email and spam protection

Emails are also scanned, adding an additional level of protection. Securepoint Antivirus Pro monitors the flow of data not only for viruses and malware; it also comprehensively filters out unwanted emails.

This is premium protection with data centre support.

As many viruses are sent from spam sources, this also provides optimal protection against zero day attacks.

System requirements for email and spam protection: Microsoft Outlook, Outlook Express or Windows Mail.

## System requirements

Antivirus Pro supports all operating systems currently covered by Microsoft's mainstream support programs. A list of supported systems and other system requirements can be found online at:

[www.securepoint.de/av-requirements-en](http://www.securepoint.de/av-requirements-en)

Before installing Securepoint Antivirus Pro, other antivirus programs on the PC must be uninstalled and the computer must be restarted.

A quick system check is recommended after installation of Securepoint Antivirus Pro.

## Virus protection for mobile phones and tablets

Don't let viruses or trojans get a foot in the door, even when you are out and about! Take advantage of the comprehensive expertise of the IT security experts with Securepoint Mobile Device Protection. Protect iOS and Android devices when travelling and in the company's own network – MDM service included.
