VIRUS PROTECTION FOR BUSINESSES

ANTIVIRUS PRO

EXCELLENT PERFORMANCE

WITH ANTIVIRUS PRO BY SECUREPOINT.

Easily manage viruses

Control all installations via the Securepoint online portal.

Strong against malware

Multiple scans for a multiple award-winning detection rate.

Maximum protection for your business – with Antivirus Pro

With Antivirus Pro, you can rely on a first-class security solution that sets new standards. Thanks to innovative multiple scans and central management via the Securepoint cloud, Antivirus Pro reliably protects corporate networks against malware — without noticeably impacting system performance. As part of the unified security concept, Antivirus Pro forms the indispensable foundation for optimal endpoint protection in every company.

Central cloud management – efficient, clear, convenient

The user-friendly management portal enables central monitoring of all installed clients — including license status, updates, and infection reports. Accessible securely via the Internet from any location, you as an IT specialist retain full control over all customer environments at all times — with just one login.

Best of all, there are no additional license costs for management. Installation, updates, and maintenance are performed automatically in the background, saving you time and effort.

Reliability and performance for the highest demands

Protection should not come at the expense of performance! Antivirus Pro combines market-leading detection rates with lightning-fast response times — thanks to the award-winning IKARUS T3.scan.engine, one of the most powerful engines in the world. This allows you to offer your end customers maximum security without compromise.

Contain virus infection

Process infections from anywhere, directly via the online portal.

Use resources efficiently

Resource-efficient system architecture for maximum end device performance.

Comprehensive protection, maximum compatibility

Antivirus Pro provides flexible protection for Windows desktops, Windows servers, and even Windows tablets with ARM processors — all with just one application and license. On-access scanners and scheduled on-demand scans offer continuous, precise defense against every threat. Thanks to fast updates from the Securepoint Cyber Defense Cloud, your protection is always up to date.

Efficient and resource-saving

The system architecture of Antivirus Pro is consistently designed for speed and economical use of resources. Seamless protection for users — without impacting their daily work.

One of the best scanning engines

With the integrated IKARUS T3.scan.engine, you can rely on a true technology leader in international comparison — and offer your customers proactive protection with maximum performance.

The antivirus solution that optimally combines security, performance, and convenience.

SECUREPOINT UNIFIED SECURITY

Cybercrime is constantly evolving. New types of attacks, human error, and technological advances present companies and public institutions with ever-changing challenges.

To effectively counter a wide range of threats, Securepoint relies on the principle of “unified security.” This means that different, complementary, and reinforcing protective measures are combined layer by layer to create a holistic defense mechanism.

Endpoint protection with Antivirus Pro is an important component of Unified Security.

ANTIVIRUS FOR BUSINESSES

Cybercrime is on the rise. Every year, the economy suffers millions in damages. The crimes range from data theft and extortion with locked computers to the failure of entire data centers. Many cases are caused by malware such as viruses, worms, and Trojans.

To protect yourself and your company, you need a strategy consisting of hardware and software solutions that ensure IT security in your company. A good anti-virus program is essential for this. The software scans emails, files, and programs for virus signatures. If malware is detected, the malicious program is isolated and removed.
